

Solutions for Brokers & Trading Platforms

Research, signals and analytics that extend the value of your trading offering.

Quant Atlas partners with brokerage firms and trading platforms to deliver proprietary quantitative research and market intelligence directly into existing trading ecosystems. Our flexible licensing models support platform integration, individual client access and branded educational engagement.

01 Intraday Signal Licensing

License Quant Atlas proprietary intraday market signals for delivery within your platform, research environment or data infrastructure.

- **Coverage:** 3,000+ instruments across supported asset classes, including equities and FX.
- **Integration:** Structured signal data designed for ingestion into charting interfaces, screeners, alert systems and research workflows.
- **Use cases:** Market monitoring, systematic idea generation, directional context and decision-support tools for end users.

02 Sponsored Client Access

Provide eligible brokerage or platform clients with individual access to the Quant Atlas research platform under a commercial sponsorship arrangement.

- **Market forecasts:** Monthly and daily chart forecasts across more than 300 markets.
- **Market intelligence:** Market and sector seasonality, institutional positioning, insider trading activity, and economic and earnings calendars.
- **Research tools:** The Chart Visualizer, featuring Quant Atlas proprietary indicators and a market scanner.
- **Editorial research:** Market spotlights and concise research documents summarizing current views and market scenarios.
- **Education:** Free access to the Quant Atlas library of educational books.

03 Proprietary Indicator Licensing

Embed selected Quant Atlas proprietary technical indicators into your charting and analytical environment so clients can use them within their existing workflow.

- **Indicator suite:** K's Reversal I, II and III, the Fibonacci Moving Average and further proprietary tools covering trend, mean reversion and volatility.
- **Deployment:** Platform-native indicator integration, subject to technical compatibility and agreed licensing scope.
- **Client experience:** A differentiated set of quantitative tools available alongside your existing charting and analysis features.
- **Commercial flexibility:** Licensing structures tailored to distribution channels, eligible users and intended use.

04 Promotional Collaboration

Signal licensing and sponsored client access partnerships include coordinated promotional activities to build awareness and encourage adoption.

- **Joint visibility:** Partner announcements, co-branded communications and coordinated product launches.
- **Client engagement:** Educational content, demonstrations, webinars and product-focused research spotlights, as mutually agreed.

Partnership Structure

Direct business-to-business model. Quant Atlas operates as a research, analytics and technology licensing partner. We do not act as an introducing broker and do not seek client-referral commissions, trading-volume rebates or revenue-sharing arrangements tied to referred accounts.

Implementation and commercials. Commercial terms, branding, access entitlements, technical delivery and promotional scope are agreed directly with each partner. Available solutions may be adopted individually or combined into a broader partnership.

Next Steps

Complimentary platform access. Broker and platform representatives can request complimentary access to the Quant Atlas platform to evaluate it first-hand, before any commitment.

Contact. Email support@quant-atlas.com or visit quant-atlas.com/enterprise to request access or discuss a partnership.
